Kirby,

The revised spreadsheet (hazard index & sediment screens for metals) is attached.

For the bioaccumulative list references, here are several:

1. "Notice of Availability of Draft Resource Conservation and Recovery Act Waste Minimization PBT Chemical List" (EPA, 1998);
2. "Bioaccumulative testing and Interpretation for the purpose of Sediment Quality Assessment" (EPA, 2000)

For the BSAF reference (for most chemicals) - "Development of Sediment Quality Criteria for the Protection of Human Health, Tier I Report", Washington State Department of Health, June 1995. I will forward to you another email with BSAFs for a few other chemicals.

Let me know if you have any other questions/comments on this.

Regards,

Gary Miller
